- Roadmapping & Prioritization

LANGUAGES

- Czech (native)
- English (B2)

ABOUT ME

I'm a full-stack developer and technical founder building web and SaaS applications end-to-end. I focus on both frontend and backend development, project ownership, and delivering production-ready solutions without micromanagement.

I'm studying Business Informatics at the University of South Bohemia, combining technical skills with a strong product and entrepreneurial mindset.

I'm developing LeadHeat, a B2B SaaS platform that automates pre-engagement and warms up leads before outreach, boosting response rates and improving overall outreach conversion.

WORK EXPERIENCE

Leadspicker s.r.o.   05/2024 – Present
