- Python
- Django

LANGUAGES

- Czech (Native)
- English (B2)

WHO I AM

I am a full-stack web developer specializing in e-commerce platforms and web applications that help businesses grow. I work on large-scale projects, handling the entire development cycle – from design and implementation to optimization and maintenance. I focus on clean code, UX/UI, and performance, because technology should drive business forward.

I am currently studying at university, which does not prevent me from working on challenging projects. I am open to new opportunities and available immediately. I prefer working on a contract basis (IČO) but am also open to full-time employment. Ideally, I am looking for a part-time role, but I am open to full-time for the right opportunity.

WORK EXPERIENCE

ARGO22 s.r.o   12/2023 - Present
Web Application Developer

- Comprehensive development of web applications, including the implementation of new functionalities, optimization of existing websites, and creation of entirely new applications.
- Utilized the complete technology stack: frontend (HTML, CSS, JavaScript, Tailwind CSS, React.js, Vue.js, Node.js) and backend (PHP, with occasional use of Django), with templating via Twig.
- I have gained deep experience in the e-commerce environment and agile development, which has strengthened my technical and organizational skills.

Virtuell s.r.o   11/2022 - 12/2023
Front-End Web Developer

- Complete development of web applications – from design conception to final implementation.
- Working with modern technologies (HTML5, CSS3, JavaScript) and a robust backend powered by the Django framework.

ALPOD.net s.r.o.   11/2022 - 12/2023
Web Developer

- Creation of simple websites using a content management system (e.g. WordPress) and hand-coding websites in HTML and CSS.
- Customization of templates and implementation of basic functionalities for responsive and user-friendly websites.
